

ZHZ 600

A HALF LIFT AND VAN LIFT COMBINED IN ONE

ZEPRO has developed the ZHZ 600 for light duty delivery vans. It has a folding platform to allow the choice of half lift or full platform size operation. The half lift mode permits unhindered access to one rear door when the tail lift is not required. However, when folded out you have the complete loading/unloading flexibility offered by a full width working platform. The hinge can also be locked so that the platform can be folded up as a full width unit when going to be used as such at the next stop. The axles of this model are equipped with grease-free bearings to reduce the need for maintenance and reduce total cost of ownership.

Dedicated mounting brackets

In order for the installation to be as simple and rapid as possible a range of customised mounting brackets have been created to perfectly match the various van chassis on the market.

The lift is continually being updated, so if you are interested in an installation on another model, please ask.

Quality hydraulic components

The most critical components in any tail lift are the hydraulic unit and the cylinders. Zepro has a philosophy to create partnerships with suppliers which allows us to have a consistency in our components in terms of quality and design. This helps aftersales to be a simple routine rather than a headache.

The hydraulic units have plastic oil tanks to save weight and are dimensioned to be as discrete and space saving as possible. Zepro knows that your principle concern is that your vehicle is there to transport goods and that volume might be at a premium.

Powder coating

Zepro tail lifts are installed on the rear of trucks and trailers and are therefore subjected to one of the toughest working environments possible. The lifts are in the direct firing line for water and salt spray, dust, sand, snow and ice - not to mention gravel and stones being churned up from the rear tyres.

In order to protect against corrosion caused by these aggressive elements Zepro inaugurated in 1997 a brand new powder painting facility in an extension to the Bispgården factory. This is one of the most modern paint shops in all of Sweden. our powder painting process, incorporating zinc-manganese-phosphating, is applied on all tail lifts and their components to give Zepro a further advantage over the competition as regards quality, corrosion protection and long term reliability.

Unique certification

Our high demands on quality encompass everything from materials and designs to service and technical support. Zepro is the only tail lift manufacturer to be certified according to both ISO 9001 and ISO 14001. Such care for the components and the manufacturing process enable us to keep product promises, not just make them.

ZHZ 600 LOADING CAPACITY 600kg

SPECIFICATIONS	
Lifting heights	850mm
Max load distance	600mm
Voltage	12 or 24V
Colour	ZEPRO grey, RAL 7024
Cylinders	Tilt: double acting, adjustable Lift: single acting
c/c	100mm
Bumper bar	N/A
Models possible	ZHZ 600-85

PLATFORMS	Lengths	Widths
Aluminium	1300, 1400, 1600, 1700mm	1400mm (700 + 700mm)

WEIGHTS, EXAMPLES				
Lift	ZHZ 600	130kg		
Mounting brackets	Various models 10 - 20kg			
Aluminium platform	1300mm 59kg	1400mm 64kg	1600mm 72kg	1700mm 77kg

ACCESSORIES	
<ul style="list-style-type: none"> ■ Rollstop on platform (flap= 500mm) ■ Radio control 	<ul style="list-style-type: none"> ■ Spiral cable control unit ■ Footstep ZHZ, cpl

An access step is available as an accessory to facilitate driver movement between the ground and van body. This replaces the original step which must be removed during lift installation.

ZEPRO - MARKET LEADER IN TAIL LIFTS

Zepro Z-Lyften Produktion AB is a Swedish based manufacturer of tail lifts. Our products have been sold worldwide since the first prototype was built in 1970, and Zepro has now grown to become the largest tail lift manufacturer in the world.

Advantages such as high quality, durability, reliable production, wide product range and global service network assure us a strong position in Europe and in many of the other markets around the world.

The company is now a part of Cargotec, a leading supplier of load handling solutions for professional users. Zepro's head office is situated in Katrineholm in the south of Sweden, 150km south west of Stockholm.

Tail lift production, development and design is carried out at the ultra modern factory in Bispgården, 90km north west of Sundsvall in the Swedish midlands. Sales, marketing and administration are handled from the head office, whereas after sales, service and spare parts are dealt with from both sites.

New tail lift with foldable platform

The ZHZ model has been developed to provide a strong, stable tail lift solution for panel vans whilst respecting the inherent space and payload limitations of such vehicles. With a discrete aesthetic and lightweight design, this flexible lift adds many possibilities to use of the van without limiting useful payload.
